---

Our customers are companies in the construction sector, industrial groups, companies of all sizes, which expect:

**PROFESSIONALISM 'RELIABILITY' COMPETENCE**

Our mission is to put systems in place that protect and waterproof innovative real estates, the source of business for our customers. Our skills begin from the design, prepared by our team of experts, whose specialty is the ability to translate the customer's needs into a solution that makes the job functional and to the highest quality

For COVERIT it is never sufficient to just install a waterproofing layer that makes a job functional, it must also be a solution which is integrated with the most advanced services through the close monitoring of the structures previous to the waterproofing.

With Coverit our customers can rely on the expertise of highly qualified personnel who are periodically subjected to refresher courses at the premises of our partners with whom we have a common goal: Quality of the solution chosen.

Coverit can intervene at any time and any place where it is necessary to create a waterproofing.
